 - UserID (auto increment unique)
 - Profile picture (string)
 - Email (string)
 - Password (string)
 - Username (string)
 - Date created (time)
 - Permissions (int: 0, 1, 2)
- Posting
 - PostID (auto increment unique)
 - UserID (from User table)
 - Title (string)
 - Description (string)
 - Price in Cents (int)
 - Date and Time (time)
 - Category (string)
 - Flag count (int)
 - Image 1 (string)
 - Image 2 (string)
 - Image 3 (string)
 - Image ... up to 6 (string)
 - Posting to user relation (UserID, PostID foreign key)
- Posting to user relation
 - UserID (foreign key referencing User.UserID)
 - PostID (foreign key referencing Posting.PostID)
- Meeting Location
 - UserID (from user)
 - Favorites from Google API? (string)
 - Meeting Location Google API? (string)
- Chat
 - ChatID (auto increment unique)
 - SenderUserID (from User table)
 - ReceiverUserID (from User table)
 - Message (string)
 - Timestamp (time)
 - Status (string, e.g., read/unread)

Screen Flow Diagram

Settings - Jimmy Le

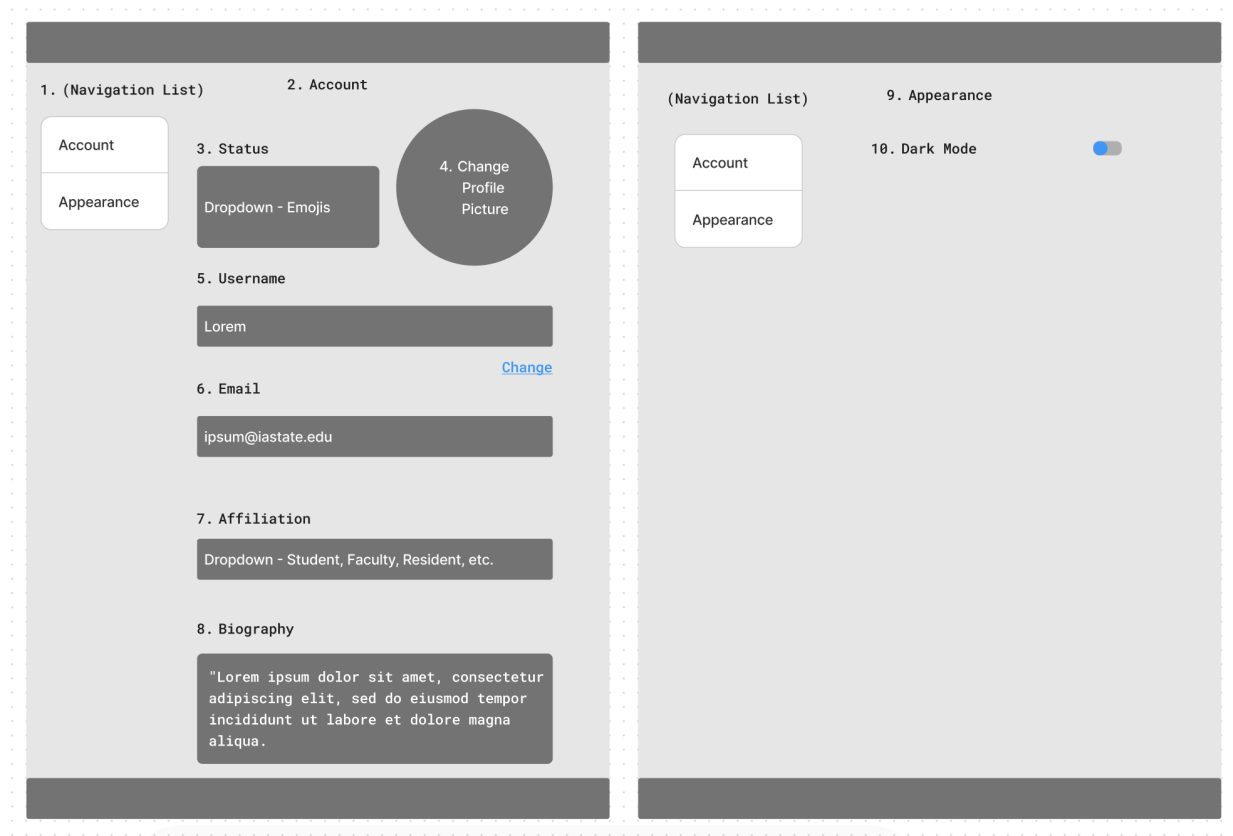

Figure 1

Description:

The settings page will direct the user to a page where they can change their account settings or the app's appearance.

1. The navigation list allows users to choose between the account and appearance pages. The default page is initially the account page.
2. The Account page is where the user may interact with their account's settings.
3. The Status dropdown displays emojis that the user may choose to display. It will be a "fun" side to the marketplace
4. The icon will allow the user to change their profile by uploading an image.
5. The user may view their username and change it if they would like.
6. The user may view their email but won't be able to change it.
7. The user can set their affiliation to student, faculty, resident, alumni, or any other affiliation with Iowa State University.
8. The biography allows the user to express a part of their personality.

9. The appearance page allows the user to change their view of the app.
10. Dark mode will change the colors of the app to a darker appearance.

Set-up Meeting Location - Jimmy Le

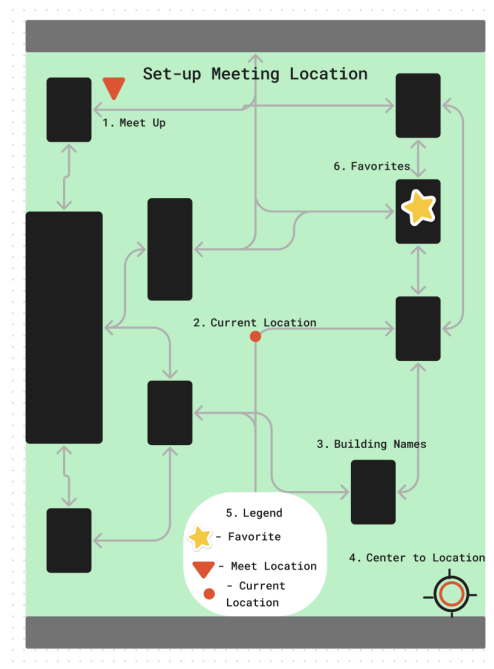

Figure 2

Description:

The set-up meeting location page will allow users to choose a specific location on the ISU Campus and confirm their meet-up spot with another user. This will be displayed with a GPS-style UI. This feature is used as a “compromise,” in which both users must agree to the location for it to be set. One user may propose an area, and the other may confirm. This feature is not required for a user to use.

1. This red arrow will display the location of where one user wants to meet up.
2. This red dot displays the current location of the user.
3. Building names will be displayed or clickable at least.
4. This button will allow users to re-center their screen to their current location.
5. The legend will display information about icons.
6. Optionally, the user may favorite a building or location on the map for easier navigation.

Chat - Jimmy Le

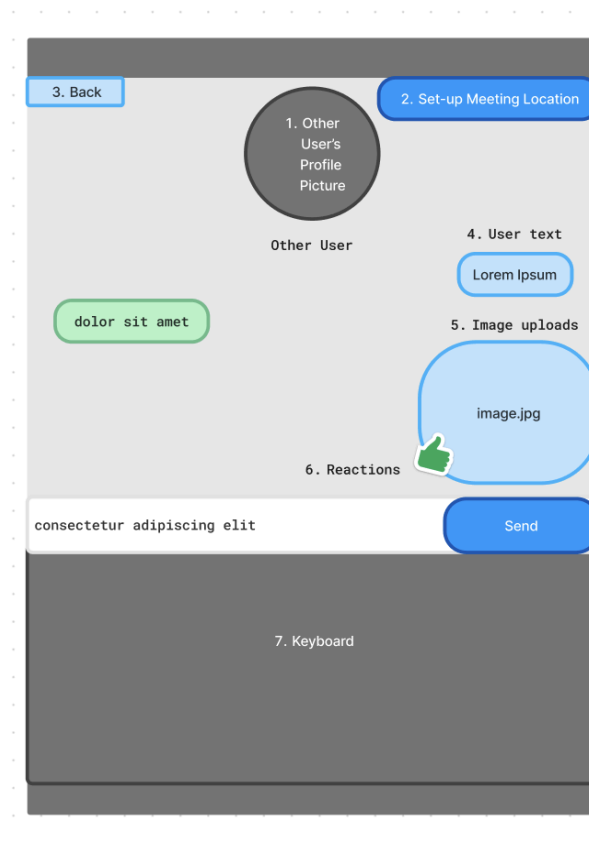

Figure 3

Description:

The chat feature will allow users to converse with others on the app. Users can send messages back and forth, send images, react to messages, and set up the meeting location from the chat feature.

1. The other user's profile picture and username will be displayed.
2. The button that leads to the set-up of the meeting location.
3. Back feature to the main page.
4. The user's messages are highlighted in blue, and the other user's messages are highlighted in green.
5. Attachments can be sent in the form of images.
6. Reactions such as thumbs up, thumbs down, happy face, etc. can be interacted with on messages.
7. The keyboard is where the user can send messages.

Main feed page - Jessica Guerrero

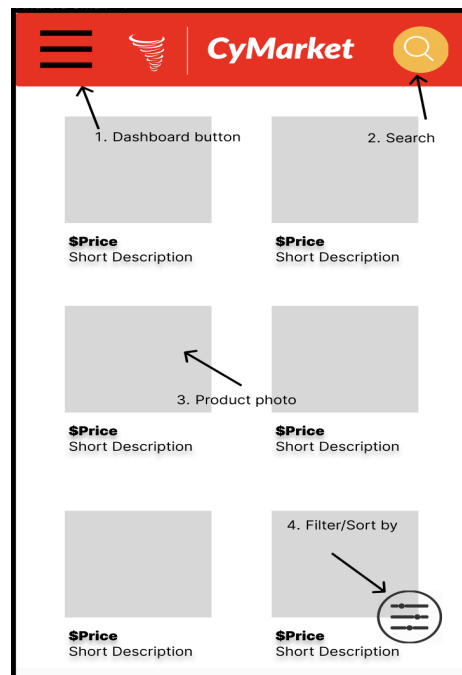

Figure 4

Description:

The main feed page is the first thing that will be displayed upon a user opening the app (after the initial sign-up and profile setup). This page will display newly listed items.

1. Dashboard button- The dashboard button will show the user other options/pages (profile, settings, chat, logout).
2. Search - Users will be able to search for specific items. Upon hitting the search button, a bar will show up where the user will be prompted to type something in. After hitting search, the main feed page will refresh to reflect the new search.
3. Product photo- Users who upload a listing to the application must insert a main visual/photo that will appear on the listing.
4. Filter+Sort by - The filter/sort by icon can filter the type of listings. For example, the user can sort by category, such as women's clothing, men's clothing, furniture, etc. Additionally, the user can sort by low to high, high to low, and newest.

Organization Main Page - Jessica Guerrero

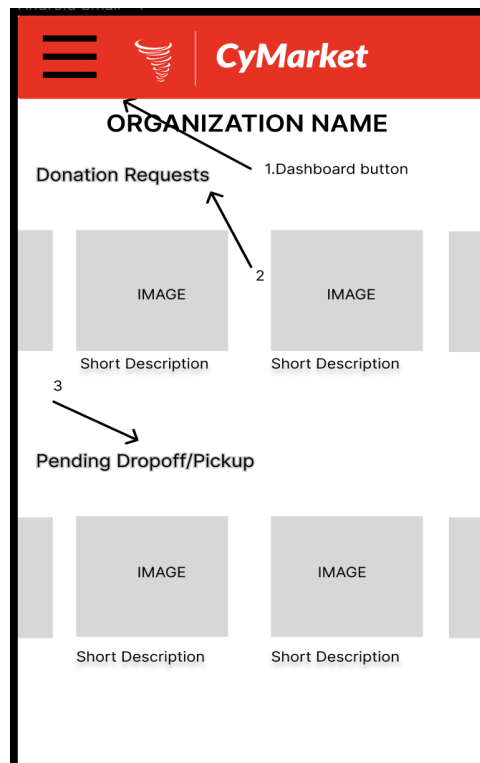

Figure 5

Description:

The organization page is the first things than an organization user will be able to see upon opening the CyMarket app. This page will donations that regular users have requested to make. Also accepted donations that have yet to be picked up by the organization or dropped of by the donater will be displayed here.

Dashboard- The organization page will also have a dashboard button which will contain other pages such as accepted donation history, listings created by the organization, organization and settings.

Donation Requests- Donations that have been made but not yet accepted by the organization will show up under this heading. Upon clicking the posting the organization will be able to see other pictures included by the donor, a longer description of the item(s) and will then be promoted to accept or deny the donation. If denied, the listing will no longer show up and if it is accepted the listing will appear in the pending dropoff/pickup section.

Pending dropoff/Pickup- Donations that have been accepted but have not yet been received by the organization will appear here. Once the donation has been received it will be moved the the donation history page/screen.

Profile Page- Annie Huynh

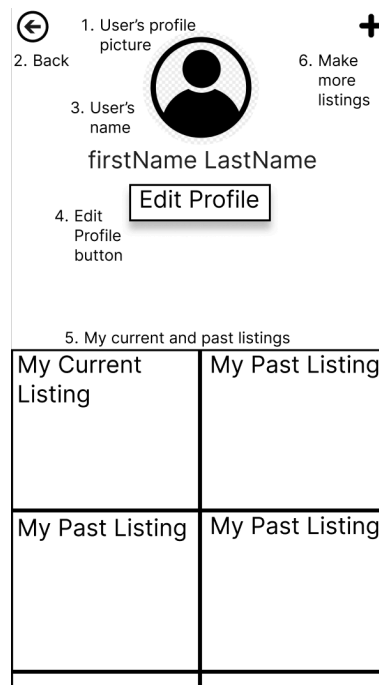

Figure 6

Description:

The profile page will allow the user to have a profile for themselves, while also being able to look at past listings, being able to create more listings, and also edit their profile.

1. The user's profile picture will be displayed at the top
2. Back to the feed dashboard
3. User's full name as listed by Iowa State
4. Edit Profile button, which leads you to another screen where you can edit or correct the initial information that you previously provided
5. My current and past listings at the bottom of the screen
6. An add button that leads you to another screen where you can create more listings if you want to sell another product

Item Posting Page- Annie Huynh

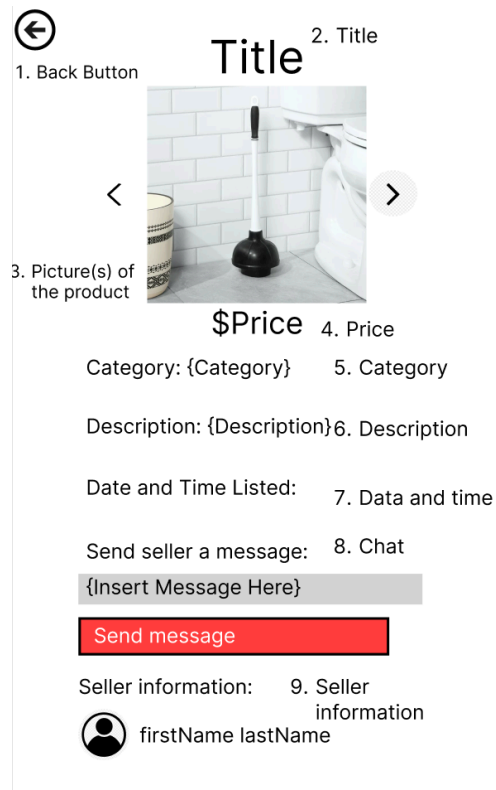

Figure 7

Description:

This page will allow the seller to convey information to the user about the product that they are selling. If the user likes the product, this page will allow the seller and the user to interact with each other if the user likes the seller's product that they are selling.

1. The back button that allows the user to go back to the main feed if clicked on.
2. The title that the seller entered into the database.
3. Pictures of the product, with arrows allowing the user to browse through the pictures that the seller provided.
4. The price that the seller provided the database.
5. The category that the seller provided the database. This will group the items into their respective categories.
6. The description that the seller input.
7. Date and time that the user listed the item.
8. A chat feature that allows the user and seller to interact with each other.
9. A portion that allows the user to click on the seller's information, allowing them to see more listings from the seller if they like the product.

ListView of reported posts (manager view) - Junhyung Shim

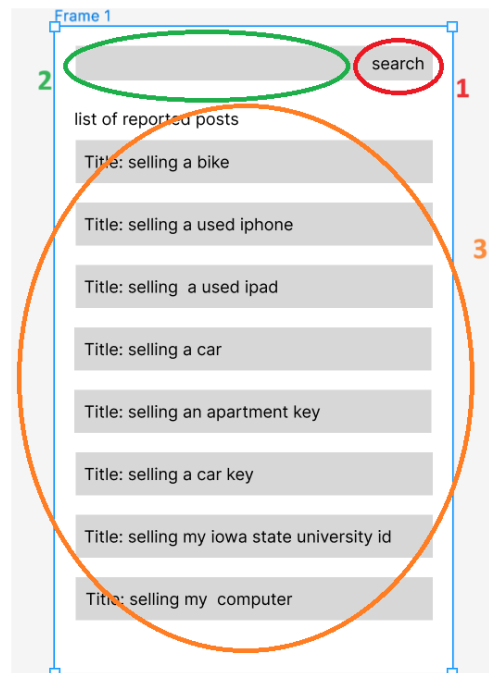

Figure 8

Description:

The view suspicious posts (listings) screen is a view only available for users with manager privileges. It allows the managers to see what posts were reported as well as search the reported posts. The manager can click on a reported post, examine whether the report is legitimate, and then decide either to dismiss the report or delete the post and/or ban the author.

1. A search button that sends the query to the backend with the information in the text box (2).
2. A text box for querying specific posts
3. List of posts that were reported as inappropriate.
 - a. The manager can click on a post, examine whether it is actually inappropriate or not, and then decide to dismiss report or delete the post

Create new listing page - Junhyung Shim

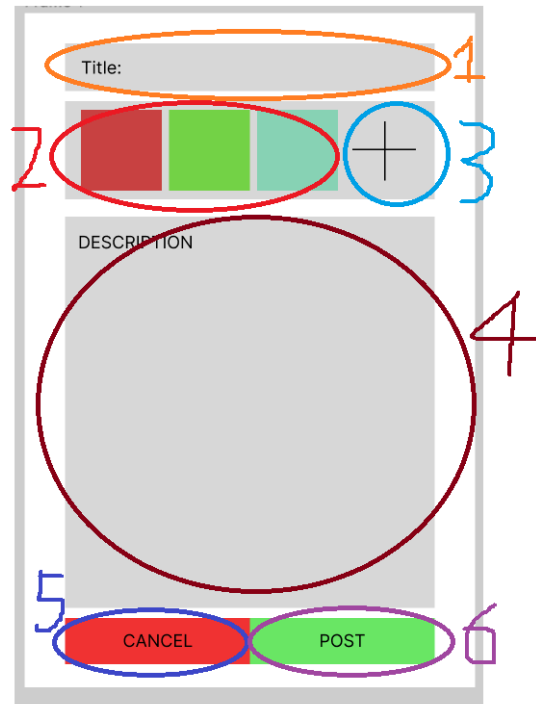

Figure 9

Description:

The create new listing page is a page for a user that wants to post an item they want to sell.

The user must have a title, at least 1 picture (max 6), and a description of the item. The user can press cancel (5) to go back, or press (6) to post a listing.

1. Title text bar where the user has to put a title for their listing.
2. preview/icons of pictures that they selected
3. An add-picture button to add more pictures (max 6)
4. A title box to hold the description of the item
5. Cancel button goes back to the previous screen before opening the “Create new listing screen”
6. Post button posts the listing to the market. If a certain field is missing (title, description, at least 1 picture), it does not allow the user to post.
